

## **LISTING OF THE CLAIMS**

This listing of claims will replace all prior versions, and listings, of claims in the application:

### **Claims 1-16 (Canceled)**

#### **Claim 17 (Currently Amended)**

Toy building block, capable ~~[[to]]~~ of being stacked, ~~with~~ comprising:  
at least one stud on ~~[[the]]~~ a top surface of the block and at least one recess in ~~[[the]]~~ a bottom surface of the block, wherein the studs are insertable in the recesses of others of the blocks, wherein  
~~the cross-section of the studs~~ having cross-sections that are like toothwheels ~~is toothwheel-like, wherein the studs showing show~~ a circumferentially arranged, substantially equally spaced sequence of teeth with rounded crests and interspersed grooves that are rounded as well,  
~~the sidewall of the recesses~~ have sidewalls ~~[[is]]~~ provided with at least one essentially vertically extending land shaped complementary to the grooves, and  
the recesses are shaped such ~~the way~~ that ~~a stud~~ one of the studs inserted in one of the recess ~~recesses~~ is guided by at least three zones of contact, and at least one of the zones ~~which being is~~ a land engageable in a groove.

#### **Claim 18 (Currently Amended)**

Toy building block according to claim 17, ~~wherein~~ further comprising at least three of the lands, ~~preferably four, six or eight lands, and most preferred four lands, are present~~ in the recess.

#### **Claim 19 (Currently Amended)**

Toy building block according to claim 17, wherein the lands constitute the majority ~~and preferably all~~ of contact zones for guiding a stud when inserted.

**Claim 20 (Previously Presented)**

Toy building block according to claim 17, wherein the studs show a rotational symmetry of at least 4.

**Claim 21 (Currently Amended)**

Toy building block according to claim 17, wherein the rotational symmetry of the studs is 6, 8 or 12; ~~preferably 8.~~

**Claim 22 (Currently Amended)**

Toy building block according to claim 17, wherein the block consists of essentially cubic ~~constructional~~ construction units, and each of the construction unit units are being provided with one of the studs ~~stud~~ and one of the recesses ~~recess~~.

**Claim 23 (Currently Amended)**

Toy building block according to claim 17, ~~wherein~~ further comprising a pass-through hole provided centrally in at least one stud or one recess, ~~a pass-through hole is provided with a first thread,~~ the hole extending from top to bottom of the building block, so that a screw may be screwed passed through the construction block.

**Claim 24 (Currently Amended)**

Toy building block according to claim 23, wherein the holes are provided with an enlargement within the studs for being capable of receiving ~~the~~ a head of a screw.

**Claim 25 (Currently Amended)**

Toy building block according to claim 17, wherein the block is manufactured ~~by blowing,~~ preferably by blowing of a material comprising polymeric mass as an essential constituent, in order to obtain a hollow, light-weight product.

**Claim 26 (Currently Amended)**

Toy building block according to claim 17, wherein the block is provided with slots, ~~preferably vertically extending slots,~~ for holding edges of construction devices ~~like panels.~~

**Claim 27 (Previously Presented)**

Toy building block according to claim 17, wherein the block consists of a bivalent building block having only recesses, and at least one stud is realized by a piece having the outer shape of a stud, yet about double its length, so that it constitutes a stud when inserted in a recess of the bivalent building block.

**Claim 28 (Currently Amended)**

Toy building block set comprising at least one toy building block according to claim 23, wherein the set further comprises at least one screw which is provided with a head, ~~a 2nd thread matched with the first thread on the middle part of its body, a third~~ first thread on its a body terminal section of the screw, ~~the third thread having a smaller diameter than the 2nd thread, and~~ and a ~~fourth~~ second inner thread in the head of the screw, the ~~fourth~~ second thread being matched with the ~~third~~ first thread so that the screw may be screwed in the head of another of the screws ~~one~~.

**Claim 29 (Currently Amended)**

Toy building block set comprising at least one toy building block according to claim 23, ~~wherein the set comprises~~ at least one screw ~~with a second thread on its body being matched to the first thread for being screwed~~ positioned into the hole of a toy building block, and ~~in that a recess in the head of the screw is provided with a recess, the recess having a cross-section comprised composed of regularly arranged, inwardly directed crests separated by circle-like generally circle shaped grooves, so that a complementarily shaped end of a tool may be inserted and rotationally fixed in the head.~~

**Claim 30 (Currently Amended)**

Toy building block according to claim 29, wherein the cross-section of the recess in its the head has at least four, ~~preferably 6 to 12~~ of the crests.

**Claim 31 (Previously Presented)**

Toy building block set according to claim 28, wherein the set comprises a screwdriver tool for a screw, the screwdriver being essentially a rod with its cross-section being essentially complementarily shaped to the recess in the screw.

**Claim 32 (New)**

Toy building block according to claim 23, wherein the pass-through hole is provided with a third thread, so that a screw may be screwed through the construction block.

**Claim 33 (New)**

Toy building block according to claim 32, wherein the pass-through holes are provided with an enlargement within the studs for being capable of receiving the head of a screw.

**Claim 34 (New)**

Toy building block set according to claim 28, wherein the screw has a body with a middle part which is provided with a fourth thread that is matched with a third thread provided in the pass through hole, and the first thread has a smaller diameter than the fourth thread.

**Claim 35 (New)**

Toy building block set comprising at least one toy building block according to claim 34 wherein the set comprises at least one screw for being screwed into the hole of a toy building block, and the screw has a head provided with a recess, the recess having a cross-section comprised of regularly arranged, inwardly directed crests separated by generally circle shaped grooves, so that a complementarily shaped end of a tool may be inserted and rotationally fixed in the head.
